D-TUERI

PERSONAL DETECTOR

Omnidirectional electric field personal voltage detector
Medium Voltage - Optical & Acoustic

Optional headphones for use
in noisy environments

Additional safety device for individual use.
Personal omnidirectional electric field detector. When the operator comes close to an electrical field between 10 kV & 66 kV, and exceeds a distance of approximately 1 metre for 10 kV and 3 metres for 66 kV, the detector sounds an alarm to inform the operator that he has entered a danger zone. While the operator remains close to the power source, the alarm continues to sound.

- For use in distribution centres with overhead lines and transformation
- Usable range: 10 kV to 66 kV
- Operating frequency 50 and 60Hz
- Powered by two LR-03 batteries
