

Aerial Observation Tags

Horizontally or Vertically Mounted

EVERLAST ... 6" Number & Letter ... Tower Markers

Our aerial observation tags and markers are superior to everything on the market for their long lasting, high visibility and low cost to maintain. The EVERLAST system is designed and proved to last in the harshest environmental conditions and the transmission tower has to be among the worst of these conditions. The manpower and time lost replace fading markers and tags is huge. Do not put up unproven tags that will fade in 10 or 20 years. Use EVERLAST and never worry about your transmission tower tags again.
